

Empathy Map

Date	1 July 2026
Team ID	SWTID-2026-4523
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand the needs, thoughts, behaviours, and emotions of users involved in the credit card approval process. By analysing what customers say, think, do, and feel, the team can better understand their expectations and challenges. This helps in designing a customer-centric Credit Card Approval Prediction system that improves transparency, speeds up decision-making, and enhances the overall user experience.

SAYS

- I need my credit card approved quickly.
- I want a simple application process.
- I want to know the reason if my application is rejected.

THINKS

- Will I meet the eligibility criteria?
- Is my credit score good enough?
- I hope my application gets approved.

PERSONA

Name: Rahul

Role / User

Type: Applicant
for a Credit Card

DOES

- Fills out the application form.
- Uploads the required documents
- Tracks the application status regularly.

FEELS

- Hopeful about approval.
- Nervous while waiting.
- Frustrated if there are delays.
