

No. of Functional Features Included in the Solution

Date	1 July 2026
Team ID	SWTID-2026-4523
Project Name	Credit Card Approval Prediction
Maximum Marks	5 Marks

Functional Features Overview:

This document summarizes the functional features implemented in the Credit Card Approval Prediction System. Each feature contributes to the overall functionality of the application by improving user interaction, data processing, prediction accuracy, and system reliability.

S.NO	Feature Name	Feature Description	Module/ Component	Status	Marks Contribution
1	User Login	Allows authorized users to securely access the application.	Authentication	Done	High
2	Applicant Data Entry	Enables users to enter applicant details through a web form.	User Interface	Done	High
3	Input Validation	Validates the entered data before processing.	Backend	Done	Medium
4	Data Preprocessing	Cleans and transforms applicant data before prediction.	Data Processing	Done	High

5	Credit Card Approval Prediction	Predicts whether the application is approved or denied using the trained ML model.	Machine Learning Model	Done	High
6	Prediction Result Display	Displays the prediction result clearly to the user.	User Interface	Done	Medium
7	Error Handling	Handles invalid inputs and application errors gracefully.	Backend	Done	Medium
8	Responsive Web Interface	Provides an easy-to-use interface across different screen sizes.	Frontend	Done	Medium

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	8
Core / Must-Have Features	User Login, Applicant Data Entry, Data Preprocessing, Credit Card Approval Prediction, Prediction Result Display
Additional / Nice-to-Have Features	Input Validation, Error Handling, Responsive Web Interface
Features Tested & Verified	8

Feature Category Breakdown:

S.NO	Category	Features in Category	Example Features
1	User Interface (UI)	3	Login Page, Applicant Data Entry Form, Prediction Result Page
2	Backend / Logic	3	Input Validation, Error Handling, Data Processing
3	Database / Storage	2	Application Dataset, Trained Model (.pkl)
4	API / Integration	1	Flask Request Handling
5	Security / Authentication	1	User Login Authentication
