Data Flow Diagram

The Data Flow Diagram (DFD) illustrates how data flows through the Credit Card Approval Prediction system. It shows the interaction between the applicant, the prediction process, the database, and the final approval result. The DFD helps visualize how information is collected, processed, stored, and communicated within the system.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded Shape	External Entity	Represents a user or system outside the project that sends or receives data (e.g., Credit Card Applicant, Bank Officer)
Rectangle	Process	Represents an activity that processes application data (e.g., Validate Applicant Details, Predict Approval Status).
Data store	Data Store	Stores application records and customer information (e.g., Applicant Database).
Arrow	Data Flow	Represents the movement of data between the applicant, prediction process, and database.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
